ON MY WISHLIST

Found my own news outlet: go out into the field and tell true stories, without filters.

PROFILE

Fifth-year student on the CAT track (Construction, Environment and Territory) and a self-taught front-end developer & designer. I combine technical training in design and drafting — also gained over three years of work-based learning (PCTO) in the technical office of Caem Group's timber division — with a passion for the web, building modern, fast and carefully crafted interfaces. I work with React, Next.js, TypeScript, Tailwind CSS and GSAP animation, with a focus on user experience, typography and minimalist design. I integrate artificial intelligence into my development workflow (Claude Code, Codex, GitHub Copilot, Gemini) and use generative-AI tools such as Nano Banana Pro, DeepSeek and Grok at an advanced level.
